GUIDANCE NOTE ON THE SCHEDULE OF CHANGES TO BUS STOPS & SHELTERS

Attached are schedules relating to proposed changes to bus stops, shelters and new and withdrawn sections of routes in the Kirklees District. Metro is directly responsible for the provision of bus stops and the majority of shelters throughout West Yorkshire. Where changes to the position of stops and shelters are proposed it is the intention to give local members a two week period of notice before work is undertaken to give them time to comment on the proposed positioning of the stop or shelter.

In certain circumstances, however, which may be due to the limited amount of time available for the registration procedure with the Traffic Commissioner (normally 54 days) or where a highway scheme is urgently required, there may be insufficient time to give the normal consultation period. In such cases, in order to provide or retain the public transport facility for the local bus users Metro may have to undertake the proposed work. However, should adverse comments then be received the situation will be able to be reassessed.

If there are any further detailed queries or you wish to discuss the matter in greater detail any of the officers listed below will be pleased to assist.

Service Changes
