Website accessibility

This website can be viewed in a number of ways, depending on your preference. There are settings and options to assist blind, visually impaired and disabled users.

If you have a problem using or accessing this site, please let us know.

[Ways to contact Metro](#)

Text size

You can alter the font size of website text by altering your browser settings (usually within the 'View' or 'Options' menu). Most browsers allow you to change the size of the font displayed on the screen either permanently or temporarily.

Viewing options

For Dragon users, the site is optimized for IE7. If you are using a newer version you will need to verbally navigate by link word command.

Alternative style sheets

If you are visually impaired, we have a number of ways you can view pages. Please select from the following list:

- [Standard Version](#)
- [Accessible Version: Black on White](#)
- [Accessible Version: Black on White, no images](#)
- [Accessible Version: White on Black](#)
- [Accessible Version: White on Black, no images](#)

Access keys

The Access keys for keyboard-only users are as follows:

1. Homepage
3. Site map
4. A-Z page listing
7. Contact us - complaints and feedback
8. Website terms of use
0. Access key details (this page)
5. Skip navigation

Video content

We upload our video to YouTube and then embed the content into our web pages. You can [read YouTube instructions for assistive technologies](#) on Google's support pages.

Where possible we upload transcripts with the video file on YouTube. Where it's not possible, we have linked to a web page containing the transcript.

Text-to-speech

Each page has a link to 'Listen to this page', usually in the top left hand corner, leading to a dixerIT toolbar. This allows you to have text or just links read to you.

Accessibility and usability standards

This site uses CSS (Cascading Style Sheets), HTML 4.01 Strict and conforms with the AA standards of the Web Content Accessibility Guidelines, DDA and BS 8878:2010 web accessibility code of practice.

The site has been tested across the major web browsers.

The site has been evaluated on the basis of Priority 1 and 2 items in the Web Content Accessibility Guidelines. All Metro-authored websites are regularly evaluated by SiteMorse, Bobby, Wave and SocITM.

We are currently undergoing a full audit by the Digital Accessibility Centre towards ensuring the site maintains its high accessibility standards.
