How do I use yournextbus?

There are three easy ways to use our bus departure times service

By text message, mobile phone internet and on this website.

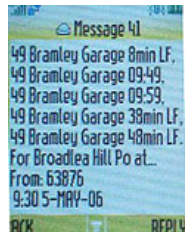

Text message

1. Create a text message, and enter the eight-digit bus stop number that you see on the post at the bus stop. (It always starts with 450. [Where do I find the bus stop number?](#))
2. Send the text to 63876
(Save it to your contacts for future use!)
3. Within about 30 seconds we'll text you back with the times for the next few buses from that stop.

Real time (live) predictions are shown in minutes (eg. 3 mins). Timetabled times are shown in 24hr format for when the bus is due (eg. 14:51).

Using yournextbus - video

[\(Accessibility information for video: Screen readers and keyboard shortcuts \(Google help centre - opens in a new window\)\)](#)

Advanced features

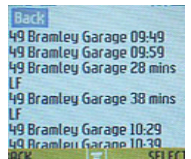

Once you've got the hang of it, you can try out some of the service's more [advanced features](#).

Your text to us is charged at your standard outbound rate, and our reply to you is charged at no more than 12p. These costs are charged by the mobile phone operators and Metro does not take any revenue from this.

Mobile internet

The majority of mobile phones now have the internet available and yournextbus has its own mobile internet sites:

- <http://wypte.acislive.com/mobile> is for more modern mobile phones.
- If you have an older style basic wap phone, use: <http://wypte.acislive.com/wap>

Enter one of the web addresses above on your phone's browser (probably under 'Internet' or 'Web' in your phone's menu), then enter the bus stop number and click on the Go button.

[Where do I find the bus stop number?](#)

The information displayed will refresh every 60 seconds so it is constantly giving you live updates of the progress of your bus.

If this is a stop you use regularly it may be worth saving the page as a bookmark so you do not have to enter the stop number again next time.

Mobile phone internet is much cheaper than texting, it will only cost you around 2p per refresh depending on your tariff.

On this website

1. Go to any page at <http://www.wymetro.com/> and locate the purple 'Find Your Next Bus' box on the right hand side.
2. Enter your eight-digit bus stop number and choose 'Go'
3. A pop-up box will appear, giving you information about the next few departures from your stop.
[Learn more about the information displayed in the pop-up box.](#)
If pop-ups are blocked on your computer, hold down the Ctrl key when you click 'Go' and the pop-up will appear.
4. If you don't know your bus stop number, click on 'Advanced search' and you'll be able to search by service number, postcode, or by using a map.
